ABOUT US

EnergyNow provides a management solution for reducing power consumption, improving efficiency, and boosting profitability in factories.

Through a platform comprised of hardware and software, we make it possible to manage electricity consumption in a flexible, visual, and practical way.

Our **committed and passionate team** has extensive expertise in a wide variety of business methodologies and technology development, merging several international certifications, advanced degrees, and experience in multinational companies.

OUR OFFER

- ✓ Smart dashboards for fast decision making.
- ✓ Integrated mobile and Web platform.
- ✓ Targeted and customized alerts.
- ✓ Intelligent algorithms for failure detection.
- ✓ Non-invasive IoT devices.

ENERGY EFFICIENCY ANALYTICS

INNOVATION LEVERAGED TO A
FUTURE-PROOF LEVEL

An intelligent platform that brings advanced smart insights allowing consumers to be more efficient in their use of electricity.

Discover equipment failures before they generate losses, prevent unexpected expenses, and know how much to pay even before receiving an invoice.

With a user-friendly interface, users can keep track of energy consumption data anytime, anywhere.

Our solution is already in use by companies in South America, and we intend to start operations in North America in 2017.
